THIS INFORMATION IS ONLY NEEDED IF YOU ARE DESIGNING A MedEvac DISPATCH

This is instructions for making the Medical Reception bgl

You have opened the "Medical Reception.zip and are looking at the Medical Reception folder. These are bgl files that you will use to create a "reception committee" for the end of your flight. If you are not creating a dispatch, you do not need this information.

At one point in making your dispatch, you will be making the Medical Reception bgl. Here is how you do it:

Making the E024B_M002_reception.bgl

1. Choose the medical center you are going to. In this example, Wrangell.
2. Go to the "Medical Facilities Alpha-Numeric by M Number"
3. Find the med center on the web page and look at it's "M" number. You will see Wrangell is "M002"
4. In your opened Medical Reception folder you will see a list like this:
    - M001_reception.bgl
    - M002_reception.bgl
    - etc
5. In this example, since you are going to end your flight at Wrangell (reception), you copy the "M002_reception.bgl" and paste it to the desktop.
6. Then RENAME it with the name of your dispatch … E024B_M002.reception.bgl. Save that and put it into the E Folder.

To see the full instructions for making a MedEvac Dispatch go to the top table of the Medical Facilities web page and click on "How to Create a Dispatch".
