

## PAKT Pay ware addon “Hole in Mahoney Lake Island - Problem/Solution”

If you DO NOT have the PAKT Payware software, the ORBX PFJ will show the island on Mahoney Lake to look like this:

If you have the PAKT Pay Ware Addon, this is how the island looks:

Basically, you will see a “sunken” island, or an island with a big hole in it. There is also another area with a similar problem. If you follow the road away from the plant and toward the ore handling facility, you will find an area where there needs to be a bridge.

When we “landscape” the Mahoney Lake island *WITHOUT* the PAKT Pay Ware addon, it looks like this:

Also, the bridge area will have a bridge and landscaping of the little river created there that drains Mahoney Lake.

If you do not want to see the Island “landscaping” or bridge area “landscaping, then you can turn both of these off. Look in your APP (Alaska Power Project) folder, you will see a “bgl” file named:

PP08\_Mahoney\_Island\_and\_bridge.bgl

If you have the PAKT Pay Ware Addon, it is suggested you find this file and change “.bgl” to “.off” so the cabin will not show “in the hole” and the bridge and river area will not show to be configured improperly. The APP zip comes with this bgl “on”.

This problem is not because of anything we are doing with APP ... this is a problem with the PAKT Pay Ware addon.
