

BWEP Dispatch #P009E

Recommended Vehicle: Ski/Tundra/Helicopter

Scenery Needed:

- BWEP Richardson Highway
- ORBX Base / ORBX Vector

Nature of Problem: There has been a medical emergency, food poisoning, at the Gulkana Glacier Training Outpost. The military vehicles are tied up ferrying people and BWEP has offered to help with the ferrying operation. We will fly from Arctic Angel 9AK4 to the training outpost location (way point P009E for the GPS), then continue to Paxson PAXK to drop off patients at the medical facility there where ambulances will take the patients on to the hospital.

Starting Location: Arctic Angel 9AK4

Special Instructions: Start at Arctic Angel and fly to the emergency location. The way point is P0093 that you can put into your gps. The altitude is about 5200 feet at Gulkana Glacier Training Outpost. Watch for the orange smoke and land nearby. Patients are being cared for in one of the large black tents and will be brought to your aircraft. Keep it warm! Once the patient(s) is/are on board, fly to Paxson PAXK and drop off the patients at the Medical facility there. (Again, they will have orange smoke out for you). Pull into the grass to stay off the runway. If in a helo, land near the smoke on the grass.
