

## **Owikeno Lake Area Refresh 2019 UPDATE**

As a part of the RTMM 2019 Refresh program, we have updated the Owikeno Lake Area scenery package.

1. A season switcher was added for all four seasons plus the default "noseason". To use the Season Switcher, go to the RTMM FAQ page look under "S". You can download it there and read the instructions for its use.
2. Nekite Lake Cabin is a new added location. We added this spot to give an easier location to fly to than Dallery's End Cabin ... only a helicopter could have reached it. The new Nekite Lake Cabin is in the RTMM Flight Plans.zip.
3. No other changes were made to the location folder.
