

Miller Lake

for
Return to Misty Moorings by Doug Linn

Welcome to the Miller Lake Scenery Package.

This is just a small cabin on a nice sized lake tucked in between the mountains. Another beautiful place in the Misty Fjords area. This location is only a couple of miles from Dan's Hideaway, about 2 miles further on the flight plan and 3 miles from Aiken Creek, about 3 miles short on the flight plan. Flying to all three makes a nice floatplane trip.

This location is accessed only by float plane but a helicopter can land nearby and the folks can walk over the little bridge to the island where the cabin is located.

Instructions:

Included in the package is the flight plan (pln file), pictures of the location, and the scenery file in the "Miller Lake" folder. Place the Miller Lake folder in your Addon Scenery folder for FSX, go to FSX into the scenery library and activate the scenery.

Enjoy

Doug
