

RTMM MedEvac Dispatch #E042B
Equipment: Helicopter or Float/ Amphibian Fixed Wing
Severe Landslide with several victims in Bella Coola Region

Special RTMM Scenery Requirements:

- ORBX PFJ, ORBX CYBD Bella Coola

Starting Location:

- Fixed wing: CYBD Bella Coola Airfield, Small Gate GA 2
- Helicopter: CYBD Bella Coola Airfield, Heliport 1

Location of Emergency: Bearing from CYBD is 119° for 10 miles.

Medical Destination:

- Fixed wing: CYBD Bella Coola: Ambulance team on apron, waypoint: M035B
- Helicopter: Bella Coola General Hospital Helipad: waypoint: M035H

Nature of Emergency:

- Smartphone emergency call to local authorities: Severe landslide up valley Nusatsum River and glacier creek from East Saugstad Glacier on narrow road. 1 car hit directly, driver reported dead. Tourist bivouac camp involved. Boulders crashed in camping car, no persons in it. Two persons injured, probably bone fractures, maybe abdominal bleeding, stable, actually not critical.

>> Transport: urgent!<<

Emergency Location: N52 15.7900 W126 25.1500, Alt. 1456 ft, Mag 310°. [Topo](#)

Emergency Way point: E042B

- **Helicopter:** You are at Bella Coola Airfield as you get an emergency call. Set your GPS to E042B. You will land close to the tourist camp and pickup the injured and fly to M035H.
- **Fixed wing:** Start at Bella Coola Airfield, set your GPS to E042B. There is a tricky water landing. Approach up valley and touch down with almost stall speed just beside the camp on the broadend creek coming from East Saugstad Glacier. Depart down valley. After patient boarded fly back to CYBD airfield, the Ambulance team will wait on the apron to transport the injured to Bella Coola GH. Maybe an heli is available to transport the injured more quickly to the hospital.
