

BWEP Dispatch #P001M

Recommended Vehicle: Helicopter or Search Plane

Scenery Needed: ORBX SAK

Nature of Problem: There is a significant pressure drop in Section 1 between Valdez and Thompson Pass. This indicates a severe breach of the line and possible hazardous material on the ground. Fly the pipeline from the Valdez pumping station toward Thompson Pass and locate and identify the problem.

Starting Location: PAVD Valdez

Special Instructions: Identify coordinates of leak and radio back to dispatch.
