

BWEP Dispatch #P003M

Recommended Vehicle: STOL Aircraft or Helicopter

Scenery Needed: ORBX SAK

Nature of Problem: Pressure drop indicated between pump stations, possible pipeline leak, see map for general area of problem. Starting Location: Thompson Pass (K55)

Special Instructions: A pressure drop has been noted between two pumping stations, north of Thompson Pass in Section 2 (See Master Map on BWEP Web Page). Fly the pipeline low and slow in the “target” area indicated on the map below. You will need to be at 300 feet to detect any leakage. Once found, report the latitude and longitude of the leak to dispatch so a crew can be sent for immediate repair.
