# Introduction to FSAD Tongass Fjords X (Supplemental)

(A RTMM scenery prerequisite)

Tongass Fjords X was developed by Holger Sandmann and Bill Womack: a wonderful scenery package. It covers a staggering 80,000 km in area and stuffed with goodies and destinations including, 7 listed Airfields, 6 unlisted Airfields, 28 listed Seaplane bases, 16 unlisted floatplane\boat docks, 31 US forest service cabins, 11 Helipads and 6 structures and areas of interest. Refer to coverage map above. There is plenty of AI traffic: Ship traffic, Aircraft GA traffic, and even AI Helicopters. Although designed for use in FSX, Tongass Fjords X can be made compatible for use in P3D with a few modifications. It is a prerequisite for RTMM's scenery packages as well as being required for the generation of additional AI aircraft and ship traffic in various area of RTMM add-on scenery.

  Please refer to the **ReadMe_First.txt** file in the download for usage rights and licensing conditions.

- **Tongass Fjords X was originally created for use in FSX but all the details of the package are also relevant for use in Prepar3D.**

Installation of Tongass Fjords X – Installation

Installation of Tongass Fjords X in FSX/FSX-SE

Tongass Fjords X is a standard installation for FSX/FSX-SE. Run the FSAD_Tongass_Fjords_X_SM.exe installer to execute the installation and use "Your Serial Number" found in the file ReadMe_Key.txt to authorize the installation.

Installation of Tongass Fjords X in Prepar3D

Installation Guide: (by Poppet): Refer to this complete guide on AVSIM:

LINK: https://www.avsim.com/forums/topic/491556-installing-tongass-fjords-x-prepar3d-v3-v4

1. **Install Tongass Fjords X to a FSX designated location.**
   Run the FSAD_Tongass_Fjords_X_SM installer and use Your Serial Number to authorize the installation.

2. **Simobjects models update in Tongass Fjords X: For Prepar3D v4 (and above) in order to avoid random CTDs (Crash to Desktop) with incompatible AI Simobjects models contained in the original Tongass Fjords X simobjects, you must update these models to FSX native models: The following file contains all the updates that are necessary.** (Click file below to download the FSX Native models and installation guide from RTMM)

   TFX SimObjects AI Update for P3Dv4-5 V1.1 8-7-17.zip

3. **Prepar3D Terrain.CFG Modification: For Tongass Fjords X full compatibility for use in Prepar3D, the terrain.cfg file in all versions of Prepar3D must be modified. (This terrain.cfg file to be modified or edited is located in hidden folder: C:\ProgramData\Lockheed Martin\Prepar3D v(x)**

   For correct display of Tongass Fjords X in Prepar3d, it is necessary to add 40 Tongass Fjords X custom Terrain Entries to the Prepar3D terrain.cfg file. (Click file below to view/copy the Terrain.cfg entries and refer to the How to Video).

   Tongass into P3D - terrain.cfg Entries Installation.zip

   Terrain.cfg How to Video: YouTube LINK: https://www.youtube.com/watch?v=zU0OKSM3DIM&feature=youtu.be

4. **Add the two Tongass scenery entries to your sim scenery library:**
   .. \FSADDON\Tongass_Fjords\Tongass_Fjords_Lower_Priority
   .. \FSADDON\Tongass_Fjords\Tongass_Fjords_Higher_Priority   When done, close the sim.

   Once Tongass Fjords X is correctly installed conventionally in your Sim, as well as the other Orbx prerequisites, you are ready to install the RTMM Scenery or complete RTMM Scenery packages.

5. **If just installing the Tongass Fjords X package, set the Orbx Central v4 bottom insertion point as follows:**

   ORBX Global openLC > INSERTED BELOW >>   Select the entry >> Tongass_Fjords_Lower_Priority

   If installing RTMM Scenery or RTMM complete packages please refer to their installation documentation.

You're Done!

If you have any questions or require any assistance with this FSAD_Tongass_Fjords_X scenery package please feel free to contact the RTMM team via the RTMM forums.
