“Here-2-There” Flying in the area from Gustavus =====

There are many places to visit from Gustavus. We've created several flight plans that we have included in this package. All of these are also placed in the RTMM Flight Plans.zip file that you can download from RTMM (This has ALL of the flight plans for RTMM!).

All of these are in the attached “Gustavus Flight Plans” zip. Add them to your simulator's “documents” folder.

Required Scenery: =====

ORBX SAK

Optional Scenery: =====

RTMM's Missing Cabins
 RTMM's Wood Lake

Installation: =====

Unzip the file to a temporary folder.
 Place this scenery areas main folder and it's sub level folder named "Scenery" and all files in that folder into your simulator "Addon Scenery" folder.
 Start up your simulator
 Go to "Settings"
 Then to "Scenery Library"
 Click on "Add Area"
 Click on "Addon Scenery"
 Locate the newly installed folder for this package you just moved into your "Addon Scenery" folder of your simulator
 Click on the main folder only. You do NOT need to open the "scenery" folder.

And then "OK" again.
Your simulator should begin to recompile your scenery library.
