Jan De Jong's AI Boats for Microsoft Flight Simulator (FS2020)
A FS2020 Traffic Enhancement from Return To Misty Moorings (RTMM)

Jan De Jong's AI Boats package provides extensive AI vessel enhancement in FS2020 for a number of areas around the world with a special focus in RTMM's area of operations.

This project was made possible by the combined talents of Jan De Jong, Dexter Thomas and Henrik Nielsen. Jan De Jong's AI Boats provides moving ships in the following selected areas: Southern Alaska, British Columbia, Cape Cod, France, Gibraltar, Holland, Italy, San Diego and Sicily

Note: This package is incremental to Henrik Nielsen's "Global AI Ship Traffic MSFS V1" package so both can be installed at the same time.

Installation

To install, copy the ge-boats-msfs folder and paste it into your community folder while Microsoft Flight Simulator (FS2020) is not running. Ensure your traffic settings for Ships and Ferries are 5% or more. All ships appear at 5% so no need to increase to 100% unless you want to see the potential repetition of the default FS2020 ships.

If you can't find a ship right away to verify that package is working, you can go to PASI at 1:00 PM local time and look for the Norwegian Star which should be in the harbor.

Known Issues

Though Jan De Jong's AI Boats package contains files with wake effects and textures, they will not show in FS2020 at this time and there is no guarantee that the wake effects will work in the future should Microsoft add that feature.
