

2023-02-13 Changelog

USFS Cabins 1 - Ketchikan Group - v2.4

.....HECS (Heckman Lake South Cabin) - New houseboat-boat04 was added to the mooring ball.

.....NOTAM: *The houseboat object I created is a replica of a real wooden houseboat where I spent my summer vacations. The boat was 21 feet long and its water home was "Smitty's Marina" on Lake Wawasee in northern Indiana. We would put the boat in the water in the early spring, then take it out and transport it to our garage for winter storage. During the winter, the family's ongoing project for the winter months was to do maintenance on the boat, painting, re-decorating the interior, etc. We will place the houseboat on several "quiet lake" locations in RTMM. The first one is at HECS (Heckman Lake South).* - Doug
