

STIKINE GLACIER ICEFIELDS for MSFS by RTMM

There are 11 icefields, ST01 to ST11.

Most runways are uneven, many are sloped. Sloped runways allow for one direction only for takeoff resp. landing. Runways are textured and so can be seen from a distance if they are not snow covered. If they are snow covered they appear just white. However, all runways are marked by borders.

Field elevation varies from 3143ft to 7215ft, runway length from 984ft to 2953. Each field has an NDB station.

Name	Elev	Length	Lat	Long	NDB FRQ	NDB Range	Takeoff	Landing
ST01	6589	1312	56° 58' 48.00"	131° 11' 49.55"	251	50	156°	336°
ST02	3143	1969	56° 55' 10.62"	132° 2' 29.41"	252	20	173°	353°
ST03	4662	2953	56° 58' 18.69"	132° 28' 15.79"	253	20	231°	51°
ST04	7215	2297	57° 7' 42.58"	132° 14' 27.10"	254	20	166°	346°
